

Examination of a baby

Next Steps

Creation of PROPERA website for information and resource for all aspects of ROP

- Distribution of Database software for uniform data collection

Creation of an Outreach team for support of new sites.

Funding for equipment and personnel.

Establish a Mobile imaging / telemedicine program.

Who We Are

About Us

PROPERA was created in 2013 to build human resource and infrastructure needed to fight this 3rd Epidemic of ROP in Developing countries. We have built a network of partner hospitals across Pakistan who are providing screening and treatment service to all such patients. The Program was started by Dr. Umar K Mian, Prof. Muhammad Moin, Dr. Naseer Mahmood Prof. Alyscia Cheema, Prof. Sorath Noorani, Prof Sajid Maqbool & Prof. Agha Shabbir Ali.

We help to develop new screening programs across the country and train staff to start the program.
